Applications close: 1 October 2021
Start Date: as soon as possible.

Job Description

Redfield & Wilton Strategies is aiming to recruit an outstanding candidate to join our team as a full-time Junior Data Visualisation Technician. We are looking for a recent graduate or someone with relevant work experience who is technology-focused.

This UK-based remote role will involve working on the visual component of our data analytics to create graphics and dashboards that will be used online, in printed materials, and on our social media. The successful candidate will be involved at every stage of the research process, working within small teams from both our technology and research departments to support projects through their full delivery lifecycle.

In addition to a competitive salary, the benefits include the flexibility of remote working, receiving professional development mentoring and training, as well as the opportunity to contribute and shape a new and exciting strategic polling venture.

Role and Responsibilities

You will work directly with the Chief Technology Officer and Technology Team to:

- Prepare and input raw data into various dashboards or interactive visualisations
- Create graphics for social media, research reports and internal purposes
- Create interactive data visualisations to complement written analysis of research data
- Think strategically on how to most persuasively share and display research data
- Identify and highlight key trends in our research

Qualities, Skills and Background

- Experience working with data & data visualisation
- Knowledge and/or proficiency with Tableau
- The following skills would be desirable regarding Tableau:
 - Develop, maintain, and manage advanced reporting, analytics, dashboards, and other BI solutions
 - Hands on with Tableau Desktop (dashboard creation, report authoring and troubleshooting, data source management)
 - Create interactive filters, parameters, and calculations for preparing dashboards and worksheets
 - Awareness of back-end administration and maintenance
- Knowledge and/or proficiency of other data visualisation software is welcome
- Experience with a coding language (Python preferred) and proficient with Excel.
- Ability to learn and integrate new technologies and software tools effectively
- Have the confidence to work cross-functionally with various departments including business stakeholders and technical personnel to exchange ideas and resolve issues
- Collaborate with business users to test, clean, and standardize data to meet the business requirements
- Strong attention to detail
- Ability to make quick decisions and to work and learn independently
- Dedication to producing high quality work and exceed expectations
- Personable, committed and enthusiastic

- Background in polling welcome, but not required

Educational Requirements

Degree in Computing, IT, Computer Science, Maths OR equivalent work experience.

Application Details

Applications to jobs@redfieldandwiltonstrategies.com with your CV (in PDF format), a brief cover letter letting us know your experience and why you are suitable for this position (which can be part of the text of your email). Include an example of your data visualisation work and links to view previous work.

If selected, to the second round of our application process, we will ask you to create various data visualisations to complement a sample of our own work. If selected for the third and final round, we will invite you to an interview.

Application accepted from individuals only. Application not accepted from companies.
